

Lab Day 1

➤ Create DB From Code:

This database will model a healthcare system with Doctor, Hospital, Patient, and Appointment entities.

- ✓ Each Doctor works in one Hospital.
- ✓ Each Hospital has many Doctors.
- ✓ Each Patient can have multiple Appointments.
- ✓ Each Appointment involves one Doctor and one Patient.

- Doctor Class:
Properties: **DoctorId**, **FirstName**, **LastName**.
- Hospital Class:
Properties: **HospitalId**, **Name**, **Location**
- Patient Class:
Properties: **PatientId**, **FirstName**, **LastName**
- Appointment Class:
Properties: **AppointmentId**

 **Add at least three rows/objects to each table**
